Care must be taken when draining tank as it contains hot water and there is a risk of scalding.

Steps below to drain hot tank

Step 1. Isolate power to machine by either switching off mains plug or removing internal plug which is located inside machine on the back- left hand side of carousel.

Turn off water supply by following blue pipe from back of machine to the stop valve and turn off water supply at mains.

Step 1.
Internal power
supply plug

Step 2.
Drain hose

Step 2. Remove drain hose from 'P' clip and pull down from under coin mechanism as per above picture.

Step 3.

Pic 1

Pic 2

Before removing the drain plug please ensure that the clamp is in the closed position (pic 1) if not then push together until closed as per above pic.

Step 4

Put a bucket in place and remove the drain plug from the end of the hose.

Step 5

Care must be taken when draining tank as it contains hot water and there is a risk of scalding.

Open the clamp by pushing down on the bottom part of the clip releasing the clamp to open as per pic.

Step 6

Once the tank is drained close the clamp and push the plug back into the top of the hose. Feed the hose up the back of the coin mechanism and re-attach to the 'P' clip.

Re – commission machine

- Reconnect water and power supply.
- Close the door and allow machine to fill and heat up the water tank, this will take approx. 15mins.
- Test vend 2 to 4 drinks to ensure machine is operational.

If machine has cold drink option

- Place machine on to free vend using free vend switch.
- Close door and Vend 4 to 6 cold drinks to refresh water in chiller.
- Allow 2 hour for chiller to reach correct temperature.

Wipe down the front of your machine with anti-bacterial wipes making sure to include all selection buttons, coin insert and change cup.
